

AUTOSTORE

Automatic Rotary Storage

□ Anzani's Surplus

- Large space saving
- Great time saving
- View on the display of the materials in each container
- More efficient production
- Suitable for any type of footwear
- Made in Italy

□ Overview

AUTOSTORE is an **automatic rotary store** for equipment storage, usually **lasts, insoles, heels and soles**, it is used in both shoe factories and apparel factories. It consists of a sequence of rotary multi-levels containers with 4 or 5 spaces each and one programmable control panel with digital display for the **automatic search** and positioning of the container, with the required items, in front of the loading/unloading point. Thanks to an electronic selector, both **load and unload** of lasts, insoles, heels, soles and other equipment, can be carried out without moving from the load/unload point.

□ Where and Why?

AUTOSTORE is particularly effective in footwear firms where the available space is lacking, in fact it allows to **thin the space** occupied by traditional warehouses for lasts and to **improve** the **order** and the relevant department **organization**, thanks to the **semi-automatic management** of lasts. Autostore located next to the start of the assembly conveyor allows the arrival of the lasts to the worker who applies the insoles without searching the same.

Configuration for Last-Holder				Dimensions and Weight			
Shelves	Bins	Pairs/Man	Pairs/Ladies	Lenght	Width	Height	Weight
10	40	960	1200	3800	1950	1700	780
12	48	1152	1440	4300	1950	1700	920
16	64	1344	1680	5300	1950	1700	1200
20	80	1920	2400	6300	1950	1700	1485
24	96	2304	2880	7300	1950	1700	1770
30	120	2880	3600	8800	1950	1700	2200
36	144	3456	4320	10300	1950	1700	2630
